

A research by: Nikita Andrianov, Luuk Geraats, Nguyen, Kate Popova, Aleksander Sopiotti, Danial Zarei, and Taurius Antanevicius

Should we act NOW?

Research questions

What will happen if we do nothing on the SDG's (right side of the poster)

What will happen if we do something on the SDG's? (left side)

What can people do on short notice to contribute on the SDG's? (left side)

EVERYONE gets free quality education.

More than **90%** of people get high education.

♦ **Join** a community to clean up a local river, sea-side or an ocean.

♦ **be aware** of your water usage.

By 2030, achieve universal and equitable access to safe and affordable drinking water for

SAVE ENERGY Insulate your house as good as you can

♦ Reduce building and electricity consumption by **14%**.

♦ More power will be generating through renewable sources.

We will be able to **stop** global warming by
Reduction of environmental impact of cities
Poverty rate will be decreased

What to do?
Create AWARENESS for self sustainable communities

43.6%

Yearly 43.6% of our* waste will be recycled in 2030 if we change something in our behavior

What to do?
1. **BUY LESS**
2. **BUY LOCAL**

Reducing **40%** Gas emission will:

- ♦ Keep the average temperature **below 2°C**
- ♦ Stop the ice caps from melting and the cities flooding.
- ♦ Prevent droughts which can bring famine.

Permaculture principles applied to agriculture would minimize land usage and the need of pesticides/fertilizers.

As a consumer, **eating meat only once or twice per week** would have a significant impact on environment.

22.1% of land on Earth is used by **Agriculture**.

~60% of it is used for beef production.

~28% increase of **fertilizers/pesticides** use over 15 years.

Temperature averages raising fast, the earth will be **HOT**.

More natural catastrophes like droughts, hurricanes etc..ural

Melting ice caps in a growing speed.

2.1 billion people globally lack safe water at home.

14 death per day due to inadequate.

One in 7 people in the world still lack of electricity
Bad energy sources => **60%** of green house gases

- ♦ People can not **afford basic** services
- ♦ Less safe, green and accessible public spaces
- ♦ **Increased** poverty rate

34%

Only 34% of all our* yearly waste will be recycled in 2030 if we change nothing...

In 2030 our* average domestic consumption will be

16.5%

Which is **TO LOW**

YES!

We should act **NOW!** Use the things mentioned in this poster to help **YOURSELF** and **each other!**
